

Description:

Allow you to display matrix of association between objects in a diagram.
You can display properties of association in cells

Screenshot:

□

#Configuration

□

Use the field inside Layout Custom Matric by Object to set what properties of the association you want to see.

Use the following syntaxe:

SCRIPTNAME1:nameToDisplayIfCheckBoxCheck,

SCRIPTNAME2:nameToDisplayIfCheckBoxCheck...

If you don't put nameToDisplayIfCheckBoxCheck, the layout will display the property name if it's a checkbox or the value of the property in other case.

don't forget to add the property of the intersection you want to display

□
